

Nebula - Tech stack

Tech stack:

- React - for front end
- Figma - for ui/ux screens
- Solidity - for smart contract development
- Etherisc GIF V2 → moved to V3 - for decentralized insurance protocol
- Privy - proposed for user onboarding
- Alchemy Kit / Pimlico - proposed for account abstraction
- Kleros - for arbitration
- Irys - for decentralized object store
- Lit protocol - for encryption / decryption and access control
- Orbis store - for decentralized database
- Lit action -for decentralized compute
